

Hackathon Demo Project

Title

Hack it 2024

Description

Support the creation of new Theta blockchain enhanced software by picking up this one of a kind commemorative NFT that is designed to showcase the new SelNet functionality that is now available on the Theta blockchain. This is a time limited mint, so don't miss your chance to pick up this potentially redeemable NFT and get technical help at minting your own commemorative NFT today!

Details

Not only is this NFT designed to showcase how easy it is to incentivize NFT sales, but it may also be redeemable for work towards your own NFT project that utilizes this new distributed sales network technology.

Check out the AmorStyle SelNet hackathon entry and note that this NFT is used in the demo.

Redeemable condition

If this project wins any of the hackathon prizes that include 2 tickets to ThetaCon 2024 in Las Vegas, anyone holding this "Hack it 2024" NFT will hold a ticket to a private event where they can ask questions about SelNet at ThetaCon 2024.

Also, for anyone holding a "Hack it 2024" NFT, I'm offering to duplicate and customize this hackathon demo NFT smart contract so you can have your own personalized NFT on the Theta blockchain, but only if I like the reason why you want a custom NFT.

The offer to duplicate and customize this NFT will expire mid-October 2024 and will be limited to at most 12 creators. The first people to contact me will be the first ones considered.

Credits

Would like to give thanks to the TraderPunks that have put up with my software develop and helped me test different NFTs. It's been a long journey and the future looks bright.
